

You need your data, let us help you protect it.

We make
Backups
simple and easy.

MANAGED BACKUPS

Managed IT Services

Your data is important. We'll keep an eye on it for you.

Your business data is essential for productivity and lost data can seriously impact your bottom line and employee happiness. Take the guess work out of your data backup processes with our managed backup solution. Your data is important, and we'll make sure it's safe and available when you need it.

Monitoring and Alerting

Data backups are only as good as the team monitoring them. Our team monitors your backups 24/7 to ensure they are working and available when you need them.

Off-site Cloud Replication

All on-site data is replicated off-site to a secure Cloud environment, providing an extra layer of protection and security.

Ransomware Protection

Secure, off-site backups are your best defense from ransomware and other forms of malware that threaten your data.

Data Restores and Support

Lost a file? Give us a call and we'll help you find it. Our support team is available for any restores or questions you may have.

Use Technology. Do Great Things.

Managed Backups

Managed IT Services

While most business leaders understand the importance of solid data backups, many organizations do not fully trust that their data is properly being backed up and will be available when and if they need it. With IT Force, our expert support team monitors your backup processes around the clock using industry leading alerting technology, ensuring that your data is safe, protected, and available.

Benefits of our Managed Backups include:

- Off-site data stored in a secure environment
- Protection from accidental deletions and insider threats
- Backups available as often as every 15 minutes
- Automated and manual testing procedures
- Industry leading backup technology
- Data backed up on-site for quick and efficient restores
- Granular or full data restores available when you need them
- M365 backups available as well
- Access to our technology experts
- Protection from Ransomware attacks
- Primary component of your Disaster Recovery and Business Continuity Plans
