

# Security matters, we can help.

How  
**Secure**  
is your Business?

## Security Health Check Professional Services

### Stay safe, productive, and connected

Security can be a challenge, especially when aren't sure where to start. With a Security Health Check by IT Force, you will receive a snap shot overview of any security issues, as well as our expert advice on addressing and remediating any issues. Each health check comes with a executive level dashboard with easy to understand findings on how you can improve your overall security posture.

#### Microsoft 365 Security Score

Review security recommendations from Microsoft that are specific to your business.

#### Executive Dashboard

An executive friendly dashboard and overview will present information in an easy to consume way.

#### Network Security Scan

Scan all assets connected to your network for any potential security issues.

#### Detailed Action Plan

Find out what to do next with recommendations on how to address any discovered issues.
